Tumour-Host signalling pathways: identification of novel ovarian cancer biomarkers and therapeutic targets

Dr Carmela Ricciardelli PhD
Research Fellow, Adelaide Medical School
The University of Adelaide

Dr Ricciardelli postdoctoral studies were undertaken in the Department of Surgery, Flinders Medical Centre, South Australia and Dame Roma Mitchell Cancer Research Laboratories, Hanson Institute, South Australia (1996-2003). In 2004 she was awarded a Fellowship with Cancer Council SA and in 2005 she moved to the Discipline of Obstetrics and Gynaecology, University of Adelaide which has enabled her to build a Reproductive Cancer research group in the Discipline of Obstetrics and Gynaecology, University of Adelaide. Dr Ricciardelli is currently funded by the inaugural Lin Huddleston Ovarian Cancer Research Fellowship, Adelaide Medical School, Robinson Research Institute, University of Adelaide for the next 5 years (2016-2020). Dr Ricciardelli's laboratory has recently explored the ovarian cancer-peritoneal cell interaction using proteomics technology. These studies have led to the identification of several extracellular matrix proteins that are mechanistically involved in implantation and peritoneal spread of ovarian cancer and may serve as novel ovarian cancer biomarkers and/or therapeutic targets.

DATE

THURS 24
MAY

TIME

12.00PM – 1.00PM

LOCATION

TRF BUILDING
LEVEL 2, SEMINAR
ROOMS 1 + 2
