

## “Mitochondrial herniation and mtDNA release during cell death”

### Professor Benjamin Kile

Professor (Research)

*Head of the Department of Anatomy and Developmental Biology,  
Monash University.*

Professor Benjamin Kile is Head of the Department of Anatomy and Developmental Biology, Monash University. An NHMRC Principal Research Fellow, Ben trained at the Walter and Eliza Hall Institute (WEHI), where he obtained his PhD in 2001.

After postdoctoral studies with Professor Monica Justice at Baylor College of Medicine in the USA, he returned to WEHI in 2004, establishing an independent research group in 2008.

The Kile lab is focused on the molecular regulation of blood cell formation and function, with a particular interest in the role cell death pathways play in the development and survival of the megakaryocyte lineage.

**Date:**

**Thursday,  
28<sup>th</sup> September 2017  
12pm-1pm**

*A light lunch and refreshments to follow*

**Location:**

**TRF Building,  
Level 2,  
Seminar rooms 1+2**

27-31 Wright Street,  
Clayton, 3168
