‘Regulatory Mechanisms of Transcriptional of Heterogeneity’

Dr Kirsten McEwen

PhD, Fellow at Imperial College London

Kirsten McEwen is a Fellow at Imperial College London investigating heterogeneity in health and disease. Kirsten holds a PhD in epigenetics from the University of Cambridge and undertook her post-doc at the MRC London Institute of Medical Sciences. Upon award of an Imperial College Research Fellowship, Kirsten established her independent research programme on transcriptional heterogeneity. Her expertise lies in integrating interdisciplinary approaches to discover mechanistic causes of cellular phenotypes.

DATE

**THURS 15
FEBRUARY**

TIME

12.00PM – 1.00PM

LOCATION

**TRF BUILDING
LEVEL 2, SEMINAR
ROOMS 1 AND 2**
